

SUSTAINABLE ALTERNATIVES LTD. (SAL)

In collaboration with

**NATIONAL COUNCIL FOR TECHNICAL VOCATIONAL AND
EDUCATIONAL EDUCATION (NCTVET)**

Environmental Management Systems

Course Topics

Participants will be introduced to

- The need for Environmental Management Systems - a business perspective
- What Environmental Management Systems is all about
- Where and how an Environmental Management System fits into the life cycle of a project
- The interpretations of International Standards
- Consideration and positioning before an Environmental Management Systems is introduced to an organisation
- A generic Environmental Management System model summarising the necessary elements
- Practical guidelines on implementation of an Environmental Management System

Course Outcomes

At the end of the course participants should be able to:

- Do initial reviews and Environmental Management System implementation planning
- Identify impacts
- Relate impacts to aspects
- Formulate environmental policies
- Develop environmental objectives and targets
- Translate environmental objectives and targets into environmental management programmes
- Implement and operate the Environmental Management System
- Check and take corrective action

Delivery Method

Lecture/Interactive group discussions and presentations - participants will be divided into groups, and given time to develop an Environmental Management System for a hypothetical organisation. Participants may also form interest groups, in which they develop an Environmental Management System for a specific sector or organisation, provided that they have enough information available.

Target Group: Senior, middle and line management who wish to develop their skills in EMS

Duration: 2 Days

Cost: \$23,000.00; Registration Fee \$1000.00
